

Safir Anand: The need to align academia with commercial realities

News & Updates • December 22, 2016

"What would you think is a worthy innovation?", asks Safir Anand in his talk at MeltingPot2020, as he elaborates on the differences between the academic percept and commercial reality when it comes to creativity.

Safir addresses misnomers about the traditional academic fields receiving priority, the need to protect invention in universities and, simply, that innovation can be fun.
