

Overview

Our patent attorneys cater to clients across all industries including Pharmaceutical, Automotive, Telecom, Energy, Chemicals, and more. The Firm is at the forefront of the changes sweeping the Patent landscape in India and has received numerous awards and accolades.

Patent jurisprudence in India is at an inflection point.

Several initiatives taken by the Government of India, including the formulation of a National IPR Policy, is reflective of the recognition of the importance of patents in building an innovation ecosystem.

A series of recent landmark decisions by the Supreme Court of India and the Delhi High Court have provided invaluable guidance to the Indian Patent Office (IPO) for assessing patent applications, especially in the Pharmaceuticals and Telecom space.

India is a signatory to the Agreement on Trade Related Aspects of Intellectual Property Rights (TRIPS), the Paris Convention and the Patent Co-operation Treaty (PCT), thereby enabling patent holders to protect their rights in multiple countries without losing priority.

Our law firm provides comprehensive Patent services including Protection, Enforcement, Commercialization and a suite of Search and Analytics services. Advanced technical qualifications, legal skills and practical business experience enable our patent team to appreciate and protect inventions across myriad technologies.

PROSECUTION

We provide services for clients from filing to grant and evaluate each patent disclosure in

accordance with the Indian patent law prior to filing it at the IPO. Most of our patent agents are also lawyers and this techno-legal qualification helps in drafting high quality patents.

CONTENTIOUS

The patent system in India allows challengers to file invalidity proceedings at several stages before and after the grant of a patent. The processes of the IPO are in a developmental stage and Courts occasionally play an interventional role in bringing these processes in line with international standards. Our attorneys specialize in strategizing for and representing clients in contentious proceedings before the IPO, the IPAB and the Courts.

COMMERCIALIZATION

In an increasingly technology driven world, tremendous wealth can be tapped by building and nurturing an effective patent portfolio. We help our clients derive value from technology through appropriate mechanisms such as licensing, technology transfer agreements, patent audits, etc. This often involves helping clients navigate through complex issues relating to SEPs (Standard Essential Patents) and FRAND (Fair Reasonable and Non Discriminatory) terms.

SEARCH AND ANALYTICS

We conduct Freedom to Operate (FTO) searches, validity searches, white space analysis, risk analysis and feasibility opinions. We are the only Indian law firm that evaluates essentiality of a patent application with the International Patent Evaluation Consortium (IPEC).

Awards & Recognition

Anand and Anand takes pride in its patent practice with one of the most diverse professionals and lawyers with dual degrees in science and engineering making up its talent pool. Our patent practice is highly commended across leading benchmarking tables.

Chambers and Partners

Our patent attorneys have been consistently ranked at the top by Chambers for our practice which includes massive patent cases, including the most hotly contested SEP matters. Our law firm is also ranked highly in its Life Sciences section.

We have retained our top position in Chambers Asia Pacific Guide for 16 years (2008-2023) now.

- Chambers Asia Pacific : Band 1 for IP and Life Sciences
- Our lawyers are ranked in two guides: IP and IP Litigation

In its 2023 editorial, Chambers cites the firm thus, “Anand and Anand is a highly regarded boutique law firm in India noted for its team of leading litigators who retain a standout reputation in cutting-edge patent and trademark disputes, as well as copyright issues. The firm is experienced in intellectual property filings and prosecutions, and also provides advice on contractual and commercial IP matters. The team is well versed in a diverse range of sectors, including life sciences and IT, and offers additional strength in handling cases relating to plant varieties. Clients include Pfizer Products and Esco.”
